

led projectors

LED verlichting biedt enorm veel voordelen ten opzichte van traditionele halogeenlampen: een zeer laag verbruik, praktisch geen warmte-ontwikkeling en een extreem lange levensduur. Ook in de professionele verlichtingsmarkt worden de traditionele armaturen meer en meer vervangen door LED's. Ons aanbod LED projectors groeit dan ook met de dag. Voor wie het bos door de bomen niet meer ziet: een overzicht...

R = Rood, G = Groen, B = Blauw, WW = Warm Wit, CW = Cold White, A = Amber

RGB Led = Tricolor LED met drie kleuren in één, je ziet geen aparte kleuren als je in de spot kijkt, geeft een homogene kleurmenging en je krijgt geen ongewenste RGB schaduwen meer.
